

TESTIMONIAL

“TEEPOS was one of a few options I was looking into. I know the owners because they worked with my father and cousin, who both own restaurants. I feel the way my father runs his restaurant is old-- fashioned. So, I went to school, got an MBA in Accounting and decided to open my own restaurant. I wanted my restaurant to be modern and organized. A new plot of land in Joliet, IL, was where I chose to build the restaurant. At first, I purchased a Casio Cash Register from TEEPOS, but once business picked up I started shopping around for an actual POS system. MicroSale is the system that I was looking into getting from TEEPOS. The other POS systems I was looking at were Digital Dining and Speedline. One thing that was a plus was the bilingual staff at TEEPOS (which would really help with programming our dishes and training our employees). The real selling point for me was that the staff never stopped helping me even before I purchased anything. I chose MicroSale and I chose the Aures Poslign hardware because I could get it in orange. This was important to me because it matched the decor of my restaurant. TEEPOS even convinced MicroSale to make changes to the actual software to fit my needs! They programmed and installed everything and went over, with me, the things I would need to know. Being able to talk to the programmers and make sure the menu was set up the way I wanted it was perfect. Training and support was part of the whole package, I didn't have to pay anything extra for it! I plan on continuing to expand and will definitely be giving TEEPOS a call again.”
